 Christian Wilson, Ph.D.
 Primary Examiner
 Art Unit: 2891

Art Unit: 2891

The brief does not contain a concise statement of each ground of rejection presented for review as required by 37 CFR 41.37(c)(1)(vi). No mention is made of the outstanding rejection of claims 16 – 19 under 35 U.S.C. 112, first paragraph.

The brief does not contain arguments of the appellant with respect to each ground of rejection presented for review, and the basis therefor, with citations of the statutes, regulations, authorities, and parts of the record relied on as required by 37 CFR 41.37(c)(1)(vii). No argument is made in response to the rejection of claims 16 – 19 under 35 U.S.C. 112, first paragraph.

The brief does not contain, for each rejection under 35 U.S.C. 112, first paragraph, an argument which specifies errors in the rejection and how the first paragraph of 35 U.S.C. 112 is complied with, including how the specification and drawings, if any, describe the subject matter defined by each of the rejected claims.

In the Final Rejection, claims 16 – 19 were rejected as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention.

Specifically, claim 16 recites the limitation of “conductive bumps are metallurgically bonded to said integrated circuit chip”. The originally filed specification describes in general the method of metallurgically bonding an IC chip to a substrate. However, the originally filed specification does not describe in a way as to reasonably convey to one skilled in the art the method of metallurgically bonding the conductive bumps to the integrated circuit chip. This is a separate and distinct process step from bonding the IC chip to a substrate.
